ENABLING.WIN

INCLINE-TO-PACKAGING

Preserve quality, optimize throughput, and maintain food safety standards.

OPTIMIZE CONVEYANCE

Smooth product *flow* through your food processing line ensures minimal product loss and impact on product quality, the highest efficiencies, and maximum throughput.

Our innovatively designed Incline-to-Packaging conveyor ensures that your product can be safely transported to the multi-head weigher while maintaining throughput and quality.

ZERO SPILLAGE

Scientific belt sizing.
Product-centric design.

50% REDUCTION IN CLEANING TIME

Open-frame design, with built-in CIP.
Toolless part removal.

SHIPS IN 1 WEEK; READY-TO-USE IN 1 DAY

Easy-to-assemble modular design.
Repurpose based on evolving needs.

Infeed hopper sized to perfection to match the upstream machine

Collection tray for easy removal of fines and dust.

Integrated drum motors that allow for ease of cleaning.

Single bearing and minimum nuts and bolts.

Air and water spray bar assembly to assist CIP

FDA approved Homogeneous Thermdrive belt for complete allergen-free cleaning

Single-spine structure for 100% access and ease of cleaning and maintenance.

Diamond Shape structure that prevents deposition of product and dirt
