

AUTOMATIC CASE PACKER

The Spider 200i double in-feed case packer is engineered for high-speed case packing, handling up to 250 bags per minute.

The machine seamlessly combines vertical case and tray loading, featuring an integrated RSC case erector and top and bottom taper. Switching between string and single packing modes takes less than 5 minutes with a simple button press. It easily adapts to different box sizes and laminate availability, ensuring versatile packaging solutions.

A reliable technology with over 100 references across the globe.

OEM PARTNER

Fully Integrated

Modular, open design with an integrated case erector and top and bottom taper.

Compact System

The compact and robust design, requires just 8m x 2m area.
