

SEASONING SYSTEM

A versatile solution, the seasoning system is tailored for a wide range of snacks, considering factors like bulk density, shape, size, volume, and capacity.

It operates on the Loss in Weight (LIW) principle, ensuring a dosing accuracy of over 99.5%, thereby enhancing your product quality.

The system reduces the need for manual intervention and maintains a dust-free environment.

System capacity ranges from 300 – 1500 kg/hour and allows both powder and slurry flavouring

OEM PARTNER

Uniform Quality

Custom designed drums ensure uniform coverage of every piece.

Error-free Dosing

Product and flavour weight-based error free dosing as per recipe.

Hygienic Operations

100% dust free system with integrated bag filters for a clean environment.

Easy to Maintain

Easy to clean and maintenance friendly design.

Your ROI < 1.5 years
